

The new JSST will call the new [Joomla! Security Center](#) their home base. The Security Center provides a public presence for [security issues](#) and a platform for the JSST to [help the general public better understand security](#) and how it relates to Joomla!. The Security Center also offers users a clearer understanding of how security issues are handled. There's also a [news feed](#), which provides subscribers an up-to-the-minute notification of security issues as they arise.
